SK NADIM

AI & Full Stack Developer | Laravel, React, React Native & Node.js | Building AI-Powered Web & Mobile Applications | REST APIs
Kolkata, India | sknadim6297@gmail.com | +91 6297616918linkedin.com/in/sk-nadim-b75726413 | github.com/Sknadim6297

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience in Laravel, React, React Native, and Node.js. Skilled in REST APIs, MySQL/MongoDB, payment integrations, AI/LLM integration, OCR, and web/mobile application development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, jQuery, AJAX, Tailwind CS

Backend: PHP, Laravel, CodeIgniter, Node.js, Express.js

Laravel: MVC Architecture, Eloquent ORM, Migrations, Middleware, Authentication, Authorization, RBAC, Multi-guard Authentication, Validation, Queues & Jobs, Events & Listeners, Routing, Controllers

Mobile: React Native

Database: MySQL, MongoDB, Database Design, Eloquent Relationships, Indexing, Query Optimization

APIs & Integrations: RESTful API Development, API Testing, Third-party API Integration, Razorpay, Stripe, PayPal, WhatsApp API, Pusher, AI/LLM API Integration

Development: OOP, CRUD, Business Logic, Server-side Validation, Error Handling, Debugging, Application Security, Performance Optimization, Caching, AI Workflow Integration, OCR/Document Processing

Deployment & DevOps: AWS, Docker, Basic Containerization, Linux, Application Deployment, Environment Configuration, Deployment Planning

Tools: Git, GitHub, GitLab, Postman, Cursor, VS Code

PROFESSIONAL EXPERIENCE

Zeon Technology and Services — Full Stack Developer

Kolkata | 09/2026 – Present

AI Question Paper Maker

- Developed an AI-powered question-paper platform for teachers using Laravel 12, React, React Native, and MySQL.
- Built question-paper generation workflows using chapter images, PDFs, notes, and teacher prompts as input for AI/LLM processing.
- Developed question bank, search, filtering, question reuse, and AI-generated/manual question management features.
- Implemented question editing workflows including add, edit, delete, reorder, marks/type modification, and question regeneration.
- Worked on OCR/document processing, AI response handling, question validation, REST API integration, and PDF generation.
- Integrated React web and React Native mobile applications with the Laravel backend.

  Tech Stack: Laravel 12, React, React Native, MySQL, REST API, AI/LLM API, OCR/Document AI, Laravel Queue, Redis, S3-compatible storage, PDF generation

Bright Stars — Forex Trading & Investment Platform

- Developed and maintained a Forex trading/investment platform with user registration, account activation, investment package, ROI, payout, and income-management workflows.
- Implemented activation package and investment-plan workflows, including configurable investment amounts and plan-based ROI calculations.
- Worked on payment gateway integration and payment processing workflows for user transactions and account activation.
- Developed ROI and payout management, including monthly return calculation and scheduled payout-related workflows.
- Implemented multi-level commission/income management, supporting different commission percentages across multiple levels.
- Built rank/level management with business-volume criteria and level-opening rules for user progression.
- Worked on admin-side management, business rules, transaction handling, and validation for platform operations.
- Implemented frontend/backend API integration and database-driven workflows for the complete investment lifecycle.

  Tech Stack: Laravel, PHP, React/JavaScript, MySQL, REST APIs, Payment Gateway Integration, Authentication, Role/Permission Management, Transaction & Payout Workflows.

Konnectix Technologies Pvt. Ltd. — Full Stack Developer

Kolkata | 04/2025 – 08/2026

Tazen (Service Marketplace Platform)

- Built a multi-role marketplace using Laravel 10 and MySQL with separate Customer, Professional, and Admin portals.
- Implemented multi-guard authentication and role-based access control (RBAC) for the three user types.
- Developed booking and availability management, along with payout and moderation workflows for professionals.

- Integrated Razorpay for payments, including signature verification and payment retry handling.
- Generated GST-compliant PDF invoices using DomPDF and built Excel export for reports.

Business Management ERP

- Developed a business ERP system using Laravel 12, React 18, Inertia.js, and MySQL.
- Built modules for billing, purchases, inventory, and customer/vendor management.
- Implemented GST reporting and permission-based administration for different user roles.
- Designed normalized database schemas and added server-side validation for data integrity.
- Built filtering and data export features for operational reports.

Animal Pride (Pet E-commerce Platform)

- Built a pet e-commerce platform and CMS using CodeIgniter 4 and MySQL.
- Developed product catalog, categories, shopping cart, and checkout flow.
- Implemented coupon system, COD/online payment options, and order tracking.
- Debugged and tested cart, checkout, and payment flows to ensure reliable order processing.
- Built invoicing functionality and a CMS for managing site content.
- Created reusable product and category modules to speed up future feature development.

TP Digital Technologies — Intern Software Developer

Kolkata | 12/2024 – 04/2025

WnDY

- Built buyer/seller negotiation and resale tracking workflows using Core PHP and MySQL.
- Implemented wallet logic to handle balances for buyers and sellers.
- Integrated WhatsApp API for order and negotiation communication.
- Added AJAX-based search functionality and role-based moderation.
- Built deal-status tracking to monitor negotiation and resale progress.

Multi-vendor E-commerce Platform

- Developed a multi-vendor e-commerce platform using Laravel 11 with Admin, Vendor, and Customer roles.
- Implemented order lifecycle management and vendor-level authorization.
- Integrated Stripe, PayPal, and Razorpay for multiple payment options.
- Used Pusher to implement real-time notifications.
- Built access control to restrict actions based on user role and debugged order-flow issues during testing.

PERSONAL PROJECT

WAREZONE — Tournament Management Platform

- Built a tournament management platform for PUBG and Free Fire using React Native for the mobile app and Node.js/Express.js with MongoDB for the backend.
- Implemented user registration, team management, and tournament/match management features.
- Added entry fee handling and prize tracking for tournaments.
- Built an admin panel to manage users, tournaments, and matches.
- Handled application deployment and environment configuration for the project.
